

Task 2: Write an essay about topic: " Travelling is waste of time and money". First, I dont agree with this opinion. I think travelling is very good for myself, namely for my health, for my knowledge and my life skills. Spend money and many time for those things looks also good. Go around the citys, go to some mountains, some famous beaches, going from north to south, etc.. Its help me have an endurable health, an open-minded, and more than that is falling in love with my scenic country. In all my travels since childhood up to now, the most exciting trip is go to Ha Long bay, where I was eat more delicious seafood , swim all day , visit many islands . The most impressived im my memory is "Trong Mai" islands. Finally, I just want to say I love trips.
