

Task 1 Hi Alex, I'm Jade. This year alone 19 years. I have a sister who has had small families. His hobby is pretty immense. I love to go shopping on the weekends, especially for family shopping. Often invites his spare time you go to the movies, go out to eat or simply sit home and talk together. I love playing with children, which is why I choose industry preschool teachers. And its something especially enjoyed listening to music while cleaning the house and cooking and even having a shower. Bye Jade Task 2 In the future, people will have more inventions than modern science. So can see the moon and the space will be a pretty ideal place for you to rest and relax.
