Task 2 As is rightly said, "A friend in need is a friend indeed". Friends are an important part of every individual's life. Everybody would agree that had friends would not been there, life would be quite boring. And you know why friends are important in our life? First of all, they always spend quality time with you and never let you feel lonely. They are always fun to be with and never allow you to get bored. Even a boring or dangerous place seems to be exciting in the company of friends. They are the ones who would enjoy with you anywhere, even in hell! In the second place, friends give you honest opinions. Friends are not only important to love and care for you or enjoy with you but also to guide you and correct you whenever you do something wrong. Also, as they are the ones who truly know what you are, they can almost always tell you what is right for you and what not. Every time you require an honest opinion regarding anything about you, you can approach a true friend. In addition, friends are the biggest support in our life. They support you unconditionally and are the pillars of strength. Even when the whole world is against you, a friend offers that much needed support and helps you gain the strength and energy to fight for yourself, against the whole world. Your friends are the ones with whom you can share any damn thing about your life; may it be your personal problems, family problems, relationship problems or any other thing that you want to share with somebody. Still many of us fail to recognize the importance of friendship. Its time for us to remind ourself importance of a friend and friendship in our life.
