

Task 1 From Duy To: Paul Hi Paul, How are you today? I have just finished my exam and my summer holiday started yesterday. I am going to come your home this weekend by bus. Your parents are in Canada now right? Can I stay at your home for a week? We will have a party with our old friend on Saturday ok? Message to me when you free. I am looking forward to seeing your email.

Task 2 The incorporatin of special effects in film was a natural progression, nessary for competing with and differentiating from other arts. A major problem with special effects is that the bad ones are talked about the most, bringing overall opinion of them down. As with bad table service, a consumer is much more likely to point out a bad experience than they are a seamless one.
