

Task2: I really love to go casual and by going casual because the following reasons. Firstly, I make sure I look trendy. I really don't like going through my wardrobe in search of what to wear for an occasion so I make sure all my wears are properly divided into three stages. One for playing around the street, another for church, visiting friends, classes and the last one for that special occasions The second reason is I hate getting dressed up for special occasions ... personally I think it's possible to look good in a pair of jeans Furthermore, in my opinion there is 95 percentage possibilities in looking good without being expensive or spending much. It all depends on what you want. To sum up, I prefer casual clothes actually. What about you ?
