

Task 1: Hi Lisa, Thank you for meeting my father for me! I write this email to give you the right direction to see my father. He is going to arrive at the ACF railway station at 2p.m next Monday. He is fat and short. He has long typical hair. Besides, he always wear glasses and a brown hat. He said that he would be wearing a white T-shirt, black trousers and black shoes. I believe you can realise him. He is going to stand right by the door of the station. Trang.

Task 2: Everyone has his or her own fashion style and it depends on the interest. You maybe like dress but others don't. It is the same when you like the long hair but others like black hair. This makes the differences between people and the colorful world. To talk about fashion, we create fashion and we need it. To me, fashion makes myself confident and happy. There are 2 styles : casual and formal. I 'd like the formal style because of some reasons. We can wear casual clothes at home to feel more comfortable but they are not enough good when you go to the places where the people need the formal looks. All the casual clothes such as T-shirts, jeans, shorts are used and they make everyone look like others on styles. Formal clothes make us a little bit more truthful and professional . To be honest, no professors want their staffes wear casual clothes to the companies. At some places formal clothes is obligated. Besides, casual clothes can't be worn to the formal parties. We would look better when wearing formal clothes such as vestons for men and dresses for women. I prefer formal clothes because of those reasons and i believe that so many people have the same thought with me.
