

Hello. I'm Thuy Linh. i'm 19 years old. i have a sister. My hobbies are traveling by spaceship. In the future, people will be traveling in outer space and to be moon with the most modern device created by man. Because human creativity is endless, they can build what they want, just the time and the support of weather, people give themselves to the moon in the early 16th century. Ever since humans can discover and manufacture a wide variety of the most advanced equipment to serve the needs of children cool. I hope to visit your country and to travel in space with modern equipment. Stay where i always wanted to be able to fly into space and set foot to the moon as you say. I will bring my family to accompany if traveling alonw would be very lonely Thuy Linh
