Task 2: Nowadays, I think shopping online is very popular . It's better than going into shops because it bring many benefits . The Internet has revolutionized the way we shop. Because of the numerous advantages and benefits, more and more people these days prefer buying things online over the conventional method of going into stores. Firstly, shopping online is very convenience. The convenience is the biggest perk. There are no lines to wait in or shop assistants to wait on to help you with your purchases, and you can do your shopping in minutes. Online shops give us the opportunity to shop 24/7, and also reward us with a 'no pollution' shopping experience. There is no better place to buy informational products like e-books, which are available to you instantly, as soon as the payment goes through. Downloadable items purchased online eliminate the need for any kind of material goods at all, as well, which helps the environment! Secondly, there is no crowds. If you are like me, you hate crowds when you're shopping. Especially during festivals or special events, they can be such a huge headache. Also, it tends to be more chaotic when there are more crowds out and this sometimes makes us feel rush or hurried. Grumpy, annoying, and smelly people also annoy me when I'm out shopping. Plus, parking becomes a huge issue. All of these problems can be avoided when you shop online. Finally, the most thing i like is comparison the price. Comparing and researching products and their prices is so much easier online. Also, we have the ability to share information and reviews with other shoppers who have firsthand experience with a product or retailer. Although shopping online has many benefits, it still has some disadvantages. In the end, it's up to you to decide if shopping online is in your best interests. It's likely that - for some types of purchases - shopping online makes more sense than purchasing locally, but that the opposite is true for others.
