

task 1: I have read your mail, Eric. It's great that you will make the meal for me, I'm so happy to know that. I'd like meat best because they have protein, you can fry, boil, or grill it with vegetables. I can imagine the meal tonight, ooh I can't wait anymore. And about vegetables, I want so many like potato, tomato, carrot, onion, lemon, orange, apple,.... because it has vitamin, fiber, strong life. Without them, I feel lack of health and it's important in our life. I'll be home at 7:00 pm to eat the meal with you, just wait me for 2 hours. Love your meal and hope you cook tasty. (To Eric: Nhung)

Task 2: my opinion is we should keep animals in zoos. The reason is conflict, because has many advantages and disadvantages, in zoos the animals don't have their life in nature, no free life but people work in zoos will protect them from hunting, killing. Opposite, in jungle or wherever in outside zoos they meet many dangerous with big dangerous animals like tiger, lion, poisonous snakes... So it is difficult to make the decision, but keep animals in zoos is better, I think it keeps them away from bad things, Now people kill animals to make medicines, foods, ooh it's so evil, lost humanity.
