

Task1 Dear Phuong I went to Thu Le zoo in Ha Noi with my friends. Although Thu Le zoo wasn't big, I found many kind of interesting animals and other creatures there: Lions, tigers and other animals were moving about lazily in their cages. Some of the animals appeared to be bores, and they took little interest in the visitors. The monkey, however, showed their natural agility. Whenever they saw visitor, they ran towards him and begged for something to eat. I was indeed amused at their behavior. Some of the birds too were very interesting to see. Their beautiful feathers fascinated me. Birds are indeed one of the loveliest creations of god. A few birds are larger than many animals. I hope that one day you through the park and watch the animals come to me. Kind regards Huong

Task2 The park is really fantastic place for young people today. Young people can participate in activities such as exchanges rewarding friends everywhere, exchange of interests together. And if such participation will avoid being involved in social evils. It would be a good for the country. While the park is also home to the fresh air, cool, comfortable fit soles of the enviromental youth participation activities and share experiences about their passion.
