My Task 2: About the topic : Watching television all weekend is not good for you. So I completely agree with you about that. Becase In my mind , watching television make you waste your time, it can be a reason about your headache, boring, tired. instead of you're watching television, You can do houseworks, take care your parents,... Or do everything outside to take a rest. For example: Go picnic with your close friends, playing some games , enjoy the fresh air in a park. Outside activites are good for you, for yourself. if you keep watching television all weekend, you don't know what interesting things you miss. That's terrible. It can make you sick, fat, slower - you can become a person who you don't want to be. So please , get far from the television in weekend. Go to help your family, meet friend or another guys to improve your personal skill, get experience to survival in your world.
