Task 2: The best thing about today's films is the special effects. Special effects help the films become more attractive and attract more viewers . Special effects help the movie characters come alive , more beautiful. Good use of special effects will help film makers make films or serve the people and help them become rich . Seen the movie or help people to relax after a tiring working hours . It also helps people learn how to do good , meaning that it brings . So I think the special effects quite important . I hope to have more good movies and more attractive for all to see .
