Task 2: In my opinion, actors is a big thing to make a successful film. They need to have ability act, can show their emotion,. Moreover, the beautiful face and famous is necessary, but it is not the only important thing to decide a successful film. In my view, the real talent of director, the finance of manufacturer and the last talent of actors are all essential. I love a film have special effects with the nice scenes, a good content and wonderful actor. For example, the film "THE DESCENDANTS OF THE SUN " had a wonderful story of love in the war, with really great special effects something like earthquake, shooting spectacular scenes..... The best actor in the film is was Song Hye Kyo, who played the private Kang Mo Youn. Kang was a doctor for famous hospital in the center, met and loved the army captain Yoo Ji Shin. They had a wonderful love in disadvantaged. I love this film because of content first, after that actors's famous. For me, you should feel the films instead of actor' famous
