

Task 1 Accepting Dear Eric, Thank you for your invitation. It's so good because you will prepare meals. I think I like meat. So can you make beef steak or roast pork? And we will eat with salad. It's OK? Today, I will go home at 7.pm. See you later. Love. Huyen Nguyen.

Task 2. There has been some arguments about the animals rights. Some people agree to keep animals in zoo, but some have different opinion. In my opinion, I think animals should not be kept in zoos. The most obvious reason is that animals which are kept in zoo completely lose their freedom. In fact, human kind was created from the animal evolution, then why can people live anywhere they want but the animals cannot ? It is completely unfair. Like people, animals expect to live with their own families rather than in a steel cage. Moreover, animals were not created just serve for people's entertainment. And I think the second reason is that it is undeniable that zoos make animals lose their basic instinct. For instance, animals may lose their hunting instinct if they are fed by zoo keepers everyday. Similarly, animals could lose their breeding instinct because the zoo staffs are the ones who decide their lovers, and even some animals are not allowed to breed. Last but not least, some animals are living in a really bad environment mainly because of budget limitation. People have to daily spend a large amount of many kinds of expenses such as water, food, or sanitation expenses result in the closure of many zoos. Therefore, releasing the animals to wild life is the best solution if people lack capability to take custody of them. Animals also have their own rights as people to live in freedom. In brief, I think that animals should not be kept in zoos. Releasing animals is synonym with allowing animals to grow naturally and providing them the best living environment.
