

task 1: Hello Alex , I read the messages you send and get to know the country you will visit my Vietnam next month. I'm glad to hear this information! And of course you come to my country we will meet. Weather my country very well , a little scorching sun as is the summer. Wish you and see you in Vietnam ! Duong.

task 2: A successful film actor just famous. I do not agree with this idea very much. Because a good film is written by the script director, also for viewers to receive what is due to film stunt like? A film was made by two factors! Famous actors would not have made the film a success. "Famous" is just the name, age and socio outside lane showbit. And a film is successful in the core is closed with expressive actor, has eaten into the character in the movie or not? That few people do, because his actors have entered into new characters understand that character, status, expressive, people of character in every scene of the film. 70% is in my opinion the actor acting acting, 30% of the script is directed. both factors combined to make the new film a success. By the director must really love his films made and took them to love their roles, such as the new success!
