Hanh Task 2; Travelling is one of the most exciting activitites of almost people. The moon and space now are not very strange to scientists and some rich people. I think, they will become popular places to go on in the future. As I know , in USA after 2020, you spend about 1.3 billion to take a trip to the moon. It quite expensive.But about more than 20 years later, tha price will be down and be uitable for many people. I also hope that I will have a chance to go on holiday in the moon once day.
