

Task 1: Eric, Thank you for your invitation for the meal tonight. I will be happy if I enjoy your talent. I cannot eat fish and potatoes, so I choose meat. Do you help me choose vegetables? Today, I will try to come back home early to help you. Maybe, I go home at 5 p.m with my parents. Love, A.

Task 2: Do you agree the opinion "It's bad to keep animals in zoos."? In my point of view, I really agree. Firstly, animals need to grow up in the nature. Because it makes the ecosystem for the Earth with many animal and plant species. Besides, it saves species from extinction or supernumerary. Secondly, keeping animals in zoos makes them bored and tired. They have no free. They lost their survival instinct, such as searching for food. Last but not least, everything should be natural development. There are many places wildlife protection in the world. It is close to nature and create suitable habitat for animals. The places that are worth more than the zoos. In conclusion, we should not keep animals in the cage. Protect them with equality as human beings.
