

Task 1: Hi Paul. We have'nt met since you moved to Sydney. I'm going to visit you this Saturday. I will go there by train. The train will start at Friday midnight so I think I will arrive in early morning. We will visit all the beauty spots in Sydney, discover food and culture there. It's will be a good time. See you soon.

Task 2: Nowadays peple spend a lot of time watching TV. Films are the most popular way to entertain after working or studying. Effects make film more attractive to viewers. In action scenes, some effects like explosions, blood, lightning, fire,... always overwhelmed viewers. In romantic ones, raining, fog, snow, flower,.. effects are very work. It makes the audiences have more feeling when watching. They will hard to forget. My favourite film is Fast and Furious because of action scenes, racing scenes with speed effects. I can imagine that I'm really driving a car. In conclusion, film effects are one of the most important parts of a successful film.
