

Task 1: Dear Alex, I'm so glad that you will be able to come visit my country. If you need any help, please ask me. About the weather, right now in Hanoi the temperature is rather high, somewhere between 30 celcius degree to 40 celcius degree, so I suggest you bring light and comfortable clothes. Light colors like white or baby blue might also ideal for this type of weather too. Because it is really sunny here, sun cream is really important, so make sure you have it on hand. I hope this e-mail will help with your preparation. Sincerely, Trang.

Task 2: In my opinion, a successful film need more factors than just actors, such as the quality of the script, the acting skill of the actors, and also how the whole filming team work together. Firstly, the script has to be written logically and also entertaining enough to attract the audience. If the movie is all about the actors' look, it will become a fashion or a beauty show, no longer a movie. Secondly, because a good movie is a journey of emotion, the actors need to be able to express and bring those emotions closer to the viewer, it is essential that actors and actresses are capable of delivering the feeling of the whole movie on the scene. Lastly, because movie is not an individual work but a work of a group of people consist of actors, director and other staffs, team work is needed in order to create the best movie.
