

Task 1: Dear Spencer, Thank you for your invitation, I've just read it few minutes ago. I'd really love to meet for dinner with you this Saturday. About your questions, I think that we should go to a restaurant named : "Small Korean" which located near my house because I like eating Korean food so much. I'll be very busy until 7.00pm so you can come at 8.00pm. You can park in front of my house and we can go there on foot. I'm looking forward to seeing you at my house this Saturday. Hope you will come on time. Bye! Your friend, Anh Thu.

Task 2: Some people say that : " Travelling alone brings us a lot of benefits." but I don't think so because it may have more disadvantages than travelling with family or friends. These are some important reasons to support my opinion. Firstly, travelling alone will not fun at all. You will feel lonely because you don't have anyone by your side. You will be bored and not know what to do, who will share amazing time with you if you travel alone. Many activities must have at least 2 people to join in. Secondly, a lot of dangerous situations, problems happen in your journey. You may sick, have accident on the way to get there. Or when you take part in some activities and you have some problems. You won't have anybody with you to help you. Many thieves, stealers have attention to steal money, phones and valuable stuffs especially when you travel to another countries. You will be shock and scared, be afraid but unfortunately, nobody there with you. Last but not least, travelling with friends and family will connect us together. It helps us understand each other more clearly. We know how to act as a team, we solve problems together. We call it "Teambuilding" or "Teamwork". We will have many more memories together than when you travel alone. This is all my opinion about " Travelling alone brings us a lot of benefits." I hope you will have same idea with me. Thank you for reading!
