

Task 1: Dear Alex I hope this letter finds you in the best of health and spirits I'm so excited when hearing you will visit my country. The weather in Ha Noi is quite hot these days and sometimes it will rain suddenly. But don't worry, it will be cool in the evening and even cold later, remember that if you want to go out at night. I think you should bring some comfortable clothes likes short or T-shirt or things like that. Don't forget take a coat, too! Hope to see you soon in Ha Noi Love, Trang

Task 2: I don't agree with the opinion "A successful film only needs famous actor". A film with famous actors just attract spectators in the trailer or on the poster. To make a great film, you needs a lot of factorials. First of all, the script is the most important things. If you have so much money or many famous actors but no good script, the film will actually be a failure. Next, I want to mention the director. A good director knows how to choose the actors who are suitable for the character, control the script and make it be succesful. Finally, the good actors is so necessary too. They may not be famous but they must be promising to complete a successful film. For example, "High School Musical" is a film which has no film star. All of the actors in that film are very young but they are so talented. That film was still popular all over the world. To sum up, I think that opinion is completely wrong. If you had a great script, a good director and the talented actors, there is no need any famous actor to be a successful film.
