

Task 1: Dear Paul, I'm looking forward seeing you on Saturday. I will catch the bus to get there because it's quite cheap. And I live near to bus station,so it's easy for me to go by bus. I will try to arrive at your house as soon as possible,about 8:00. So we will have much time to talk,eat and do funny things. I hope that we will take this chance to see a movie, walk in the park. See you soon Your friend Duong

Task 2: Film industry is growing sharply in these days which has different types. There are many things that can attract attention of viewers but I believe that the best thing about today's films is the special effects. The initial reason is that special effects can impress viewers powerfully. They make films become more lively, which is the key element deciding whether viewers want to watch films or not. Scenes become attractive and eye-catching if producers use this effects in their films. For example, Fast and furious 7 is very famous because of special effects like car accident scene.And one of the famous one is that director used techniques to make Paul who had died due to a car accident in reality still live in that film. The next reason is that using the special effects prove the development of applying technology in films. Viewers tend to be curious about new, inexperienced things that technology can make. Therefore, they choose films that are used a lot special effects. In sum, the special effects are the best things in film's today.
