Task 2: Are you a shopaholic or indifferent of it? Do you go into the shopping centers or buy through the Internet ?As for me, the idea of shopping online is a better choice to get the thing you want. Firstly, It is so wonderful for someone who are absorbed in working, in study and they have no time to buy directly in shops. For example, you can know full information of goods and only by the clicks of mousse you can buy anything from a brush-teeth to a luxury car,... Everything seems to be easy and comfortable. The second reason is that the delivery service is quite convenient and you dont have to get out of home to carry a lot of things by yourself. The online shops can help you do this by home delivery service. Finally, I guess, almost everybody like this type of shopping though there are some troubles such as, the things you buy dont fit you,... Dont worry, it will be dealed by the help service.
