

Task 1 : Dear Eric, I am very happy because you will make the meal tonight. Well, I would like meat because i really like protein. I want to eat spinach sauteed with beef. That's my favorite dish. Because today is a holiday so i will stay home all day. You can go on always. Do you want me to buy something to complete our dinner not? I will go to the supermarket this afternoon. If you want to buy something. you will call me. Thank you for having inteded to do for my dinner. See you tonight.

Your friend Thu Task 2 : Free the animals in zoos. It is wrong to keep animals in zoos because animals are just like human beings , they have feelings and emotions. They have to live , eat , sleep, breed , die and overall freedom .These are the 6 important factor of life . For example , African elephants can weight as much as 14,000 pounds and are used to traveling between watering holes and feeding sites hundreds of miles in order to be emotional and freedom .Can you imagine having this elephant in a case? . Even if you give a lot of food or water this animal is not going to be happy because the zoo is not his home, the jungle is the place where he belongs . What we can do is like in Africa , have an African safari Zoo with plenty of space, rivers and a lot of green forest so everybody can visit them.
