

Task 1: Dear Ly, Hey, How are things? Are you going to do something on Saturday morning? I am writing to ask if you free on Saturday morning, could you please pick my father at the railway station comeback home? I will have an important test on Saturday, so I can not be there to meet my father. He will arrive at 8 a.m. He is not very tall but pretty fat, I will send you a picture to easy to find him. He will be wearing a suit and a brown hat. Tell me if you can go or not, okay? And thank you so much. I will invite you for lunch Your friend, Anh

Task 2: Fashion style is the thing that almost people concern. It's the key of appearance and people sometimes judge the others by the way they look. We should know how to dress consistent with the circumstances, casual or formal. In my opinion, I like wearing casual. Because wearing casual is freestyle, it will show who you really are and your character as long as don't be ridiculous. Wearing casual make we don't be so serious and don't waste time preparing the clothes. We can wear anything we want but suit with us and the place we go. I think if we wear comfortable, we can do anything we like and people will talk with us without inhibition First of all, wearing casual show your own character. Each of us have own style, not everyone are the same with each other. If a girl always wears a pink dress, she exactly womanliness. If a boy wears some clother that looks like rock and roll, he must be strong personality, and dynamic. So that wearing the things that we like is the coolest. It will show people some part of yourself without your saying. Secondly, we don't waste time for preparing. Imagine when everyday, you wear a suit, and what you have to do with it. You must make it neat and smooth by electric iron, you must wear it with a white shirt and a tie. It's really prolix and you will be so serious. It just suitable when go to work or some event, but when daily, you should wear casual. The last, wearing casual make we comfortable. We confident when we wearing what we like in every circumstances. That also make us look prettier and easy-going for everybody. For example, when we go to a party, you wear a dress that you love the most, you definitely look very beatiful. In concluding, fashion style is very important to people, the thing we can not live without. Not wearing casual or formal is more important but just weaing the way make us happy
