

Task 1: Dear paul, Paul How are you ? About your visit on Saturday , when arriving I will call for you , to make my 8:30 am class will reach your seat . As for whether we are going to do that day , I thought we 'd have lunch somewhere quiet to talk nonsense , I do not see you long time so there will be lots of stories to tell . Then I'd go to the movies with friends , you can buy me popcorn and drinks little , we can watch a movie and eating popcorn while certainly be very great . In the evening we will have dinner together , I 'll cook dinner for you . I can not wait for our meeting on Saturday . See you on Saturday . Goodbye paul . Love paul Task 2: Now there are a lot of good movies, to create an exciting, thrilling the audience watching the film, the producers had to add effects such tricks to entice the audience into the chase sequences, make vivid for the movie, highlighting the dramatic circumstances climax of the film. If a movie has no tricks, special effects likely to make viewers feel boring, unattractive, do not create a sense of authenticity to them. So a movie needs to have effect, but do not overdo it, there are so many tricks will make the audience feel the film is not true. To create a blockbuster filmmakers must have an insight in the selection technique integrated into the scene so that the most reasonable. From here I feel the use of technique is needed for a good movie.
