

Task 1 : Dear Spencer, Good morning! What do you do? I haven't seen you for a long time, since Bella's birthday party I miss you so much. And you? I want to invite you to dinner. Can you go to dinner with you on Saturday in week ? Near my home, there is a restaurant, good food and good service. The restaurant is called " The pizza and pasta " . We have a dinner at 7 p.m and we can talk to each other. Parking here in the basement, next to the restaurant. Glad we can meet again. See you tomorrow night . Bye bye! Friend, Quynh Huong.

Task 2: Travelling alone brings us a lot of benefits. That is also not entirely correct . According to my opinion, to travel alone some beneficial, some harmful. First of all, traveling alone make us feel comfortable, free, not dependent anybody. A journey which they have to decide where to where to go, can go where you like, without discussion or consultation from anyone. Traveling alone so interesting. Trip through, they know how to live independently. But traveling alone feel very lonely, no one to talk, fun, nobody discover interesting things to. If not lucky you can get sick or have problems that no one helped us. Traveling with friends, we will feel better , so happy . They can help each other, rely on each other, have fun together and discover something interesting and useful. They will unite and attachment, rather close together . They have many memories together over. They will have more exciting experiences.
