I love rock music very much. What kind of music do you like ? Please write for me soon. I'm waiting for your reply Love Tam

Task 2: Nowadays, many people have gone to the moon and space, but I don't think this will be popular places to go on holiday in the future for some reasons. Firstly, It's very far from the Earth to the Moon, about 384.403 kilometers. Therefore, It will take so much time to travel there Secondly, It's very expensive to go to the Moon and space. There are not many rich people who can afford this tour. Last but not least, I think there will not have modern spacecrafts for people to go there. The new capsules must be larger, with three times the volume capacity and the ability to accommodate a four-person crew but I don't think it will be available in the future. In conclusion, the Moon and space will not be popular places to go on holiday in the future
