

Task1: Dear my friend, I'm sorry for not being able to attend party because I have a important final test on Friday so I have to learn. But, I'm free on Saturday and we can meet. I would invite you to eat Japanese food! See you on Saturday. Love, Tra.

Task2: Our Earth is the most beautiful in our Solar system. As far as we know, Earth is the only planet that has life. Our Planet is threatened by many factors, so we must protect our Earth. I think we should protect the forest. Forest maintain the balance of nature, the environment, the climate and the weather. Besides forests give us oxygen, food, medicines, fuel, furniture and protect us from the heat of the sun, storm of wind, ... Forest brings many benefits for our life. But we are destroying the forest meaning we are destroying our life in future. Because the forest save us, we must save plants and forests. What can we do to protect Earth? In my opinion, we should plant more trees, don't allow for anyone cut trees. Secondly, We must speak out and write against polluting industries. Lastly, make students and citizens aware of the importance of saving the environment, and the many things that we can do to protect the environment, forests and wildlife. Now we all must become aware of these consequences. Let's try our best to stop all this.
