

task1 : Dear chris I very sorry because i didn't come to your party. Because I have to go Exam .so I have to go Exam .I'm going to the supermarket to buy a few things ,prior to where you're going to buy some sweets such as pizza, pastries, orange juice,.. for us to open a late dinner .although i really sorry because unable to arrive on time . I would go there on the 7th, to make up for my mistake you. Love,

Chris Task 2: At 13 pm EDT 10/5 (11/5 News 0 hour by hour Vietnam), Agency for Aerospace America (NASA) will press conference announcing the latest discoveries of the Kepler telescope during implementation tasks, Parent Herald reported. The press conference with the participation of the following members: Paul Hertz, director of astrophysics at NASA headquarters in Washington DC, Timothy Morton, a researcher at Princeton University in New Jersey, Natalie Batalha, scientists Kepler mission at Ames research Center at Moffett Field, NASA in California and Charlie Sobeck, who led the mission / K2 in Ames. According to the Express, Ellen Stofan, NASA's chief scientist, who refers to people going to find out the truth about aliens. "We're going to discover things that humans ever wondered throughout the millennium. We will know if there is life on other celestial bodies outside our solar system," Stofan said. He also emphasized that the findings will affect life on Earth. When Kepler telescope was launched into space in 2009, the scientists do not know much about extrasolar planets. Thanks to Kepler's data warehouse, astronomers believe that at least one planet orbiting a star in the sky. Many comments speculate NASA press conference tonight will probably announce another planet capable of life exists or once existed a planet life. I would happily get in on a new planet that has life, I hope to live there in the future.it is worth the wait.
