

Task1. Thank you for your email Chris. It was very pity for me not to come to the party last night, because i had to visit my mother's house. So we can meet on Saturday, i would like to go coffee and talk to each other about your work. And later we can go shopping in lotte. Long time no see , i really miss you, i'm look forward to seeing you. Task2. Nowadays, our environment is being polluted seriously by many things . It is getting worse and worse if people don't do something . For example , the ozone is being attacked by the polluted smoke like cars,factory, too informal. Firstly, you must know the 3R, they are: reduce, reuse, and recycle. Myself, i think it's the best way to protect our environment . Don't throw the trash anywhere , you must put the right place. or the water never pour anything - especially waste oil or leftover lawn chemicals - into a storm drain. It will end up in the nearest stream. So why we all need to look after the planet because it's our life, fulture. It's a place we have to live at the moment and in the fulture . Finally, anyone need to do something well for the environment, for the better world.
