

task 1: Hello Eric. I was reading a letter from me. I will come the meal tonight. I like eat meat. I like vegetables such as apple, bananas, tomatoes. I will come to your house at 7p.m tonight. After eating will work with you to talk .Thanks you.

task2: It is wrong to keep animals in captivity because animals are just like human beings , they have feelings and emotions .They have to live , eat , sleep, breed , die and overall freedom .These are the 6 important factor of life . For example , African elephants can weight as much as 14,000 pounds and are used to traveling between watering holes and feeding sites hundreds of miles in order to be emotional and freedom .Can you imagine having this elephant in a case? . Even if you give a lot of food or water this animal is not going to be happy because the zoo is not his home, the jungle is the place where he belongs . What we can do is like in Africa , have an African safari Zoo with plenty of space, rivers and a lot of green forest so everybody can visit them.
