

Task 1; Hi Eric, Thank you for making me dinner tonight. It was disturbing to your concerns. I want to eat meat stock you cook, you cook delicious dishes. I want to eat green beans and add a little more fruit at dessert. About 7 hours I would come home from work, I would go early so you do not have to wait long. See you soon and have dinner together offline. Best friend, Thuy Tien Task 2: Here I would like to present their views on the theme "It's bad to keep animals in Zoos". As far as I know, animals are put to the zoo as a place to visit for tourists and to protect them. So compared to the animals living in the wild, the species bred in the zoo live longer because they are provided nutritious food, health care is and have a safe haven, due the risk of attack. The zoo protest movement by activists to protect the rights of animals held, in order to oppose the captive animals in zoos. While the zoo's authorities confirmed the keeping of animals in this environment is to conserve rare species, the protesters said that if you intend to preserve, you should drop them on habitat in natural. And every human being should have the sense of protection to animals than they exist and not locked up in zoos. Post my argument here is the end, thanks everyone has read it.
