Task 2 Nowadays Shopping is a dispensable thing. Some people say " Shopping online is better than going into shops". I don't totally agree with this opinion. All things also have advantages and disadvantages. Shopping online is like that. First about benefit. Shopping online help us save time. We don't need to go to shop to buy things which we need. We only need at home and turn on laptop or computer or our phone . We can find all necessary things. It's convenient and you can spend your time to do another things as watch TV or play games. Secondly, about disadvantage . Shopping online have many risk. Not all shopping online is reliable. If you don't have experience, you will be cheated. You can be bought counterfeit things and they are easy to be frustrate. Things that you buy on online shop can't same as you imagine and you will feel disappointed . At the end , My opinion is shopping online is good but it can't instead of going into shops . And when you go into shop with your friends i am sure that you will feel more interested than shopping online
