I am looking forward to seeing your email. Task 2 Online shopping is most convenient for individuals that don't have time to go to the store. If you are busy with an online job or online classes then online shopping can sometimes be more convenient. It iss also convenient since you do not have to drive, catch the buss, wait in long line or deal with not being able to find an item. All you have to do is type in the item you are looking for and it is there. Once you find the item you can order it at anytime because online stores never close.
