

Task 1: Hi Alex, I am so eager to see you next month and im glad to hear that. We haven't met each other for a long time my friend. I have many funny stories to tell you! We can go out and play together, have meals also... The weather now is so hot. I think this is the hottest month of the year. The weather next month may change a little bit. It can be less hot but it can be very comfortable, to be honest. You just should bring T shirt, jeans and shorts i think so. Call me when you arrive! See you soon. Linh.

Task 2: There are so many different opinions around the topic'' A successful film only needs famous actors''. The opinion has a problem. It underestimates all the parts that make the film except the actors. We all see that the actors have the great influence on the film because they are the one that send the information by the action to the people watching. From the actors, we can see the meaning of the film, what the director wants to tell. However, the actors aren't the ones who write the scenario,or the ones that give the directions, the ones that add the music, the sounds ect. The film also needs a good content, which the spectators care most. They don't want to watch a film that has good-looking actors but the boring content. The actors that are famous may bring the good attention to the film because they have strong fandoms,and all their information are uploaded on the internet which creates good influence but it doesn't show indication that the film is up to them. I have seen many films that the actors are not much famous but the films is really worth watching. Therefore, the opinion is not right.
