

Task 1: Hello, It is so nice to be your friend, Alex. I'm 21 years old and I have a younger sister. She is 3 years younger than me. My favourite hobby is going out with my friends such as going to the theater, eating, having cups of coffee or just driving around the West Lake. Sometimes, I prefer staying at home watching TV or reading some kinds of books. What about you? Tell me something about yourself.

Trinh. Task 2: Going on holiday on the moon or space will be another great achievement in the history of mankind. In my opinion, I do not think it is a good idea. Firstly, it will cost a huge amount of money to do that. Many countries in the world have not developed yet. They lack a lot of money which is needed to have if they want to spend their holiday in outer space. Besides, nowadays, the Earth is becoming hotter and hotter as a result of global warming. Governments should spend money inventing new modern machines or developing technology instead of going on holiday on the moon and space. Secondly, when going out there, people must have to wear astronaut clothing because there is no air in outer space. It helps provide oxygen for the astronauts and reduce the pressure difference inside and outside the body. But, on the contrast, such clothing will make people feel uncomfortable and inconvenient. Just a torn hole appears on the clothes, you will be dead because of lacking oxygen.
