

Task 1: Dear Alex, I am very happy to receive your email. Let me introduce myself, my name is Yen Pham. I'm 20 years old. At the moment, I am the first year students of the University of the capital Hanoi. My family has 4 people: my father, my mother, my older sister and me. My parents are farmers. They are very kind. My older sister is 22 years old. She is a teacher. I love my family. In my free time, I like listening to music, reading book or going out with my friend. What about you? I hope to see you soon! I look forward to hearing from you! Yours sincerely, Yen Pham

Task 2: it was suggested that The moon and space will be popular places to go on holiday in the future. I think this opinion was creative. if we get to the moon, we will be discover many new things. We can have unique experiences like jet-lag solutions such as shower water infused with Vitamin D. These robotic probes paved the way for a giant leap forward in space exploration. On July 20, 1969, Neil Armstrong and Edwin "Buzz" Aldrin became the first people to reach the moon when their Apollo 11 lunar lander touched down in the Sea of Tranquility. Later missions carried a lunar rover that was driven across the satellite's surface, and saw astronauts spend as long as three days on the moon. Before the Apollo project ended in 1972, five other missions and a dozen men had visited the moon. After the dramatic successes of the 1960s and 1970s, the major space programs turned their attention elsewhere for a period of several decades. But in 1994, NASA again focused on the moon. The Clementine mission succeeded in mapping the moon's surface in wavelengths other than visible light, from ultraviolet to infrared.
