

task 1: Dear Chris, I'm sorry for having not come to your party last night. Yesterday I was too busy. I had to go to school from morning till afternoon. And when I came home, I was so tired and sleepy, that time I thought I would took a nap and then I would come to your house. But I slept so well that when I woke up, it was 7 am this morning oh my god!!! I really really sorry about that. This saturday I won't busy, so we can meet, and I wanna go to the theater, I love the movie called "the conjuring 2". So call me to book time and we will go, ok? Love, Ly!

task 2: this planet is ours, we live in there, so everything in this planet will effect on our lives. We must protect the enviroment because if it is polluted, we will be harder to exist. No more fresh water, no more fresh air, and our lives will be in danger because we will be living in a dirty, polluted environment. It effect to our healthes, our breaths are being polluted because dirty air. So where the dirty air come from? It comes from the traffic, from the factories,... We breathe in the dirty air, so we will have many diseases about respiration. We throw trash everyday. many is plastic. Plastic is hard to disintegrate. it takes a long time, so it makes the enviromtment polluted. Trash is everywhere, full of trash, it is so terrible. I think we should cut down using plastic, we ought to use paper bag instead of plastic ones. Paper is easier to disintegrate than plastic. So paper is friendly with the environment more than plastic. Many factories let the waste water out to the rivers, the sea. It makes the water polluted. We will have to use dirty water because the fresh was polluted all. Everything all about environment effect to this planet. The environment is being killed, this planet is beng destroyed, and it will kill our lives soon. Protect the enviromtment is protect this planet, protect our lives, our healthes. Do it right now!
