

Task 1 : Dear Sam, What a coincidence! I received your email when I was listening to my favourite song. The name of the track is Treasure from Bruno Mars. Bruno Mars is my favourite singer. His voice is so good, warm and strong. I love listening to his track very much and I listen to it nearly everyday. He's a famous singer in the world with a lot of amazing music songs. I think you should try listening to his music. Your Vietnamese friend Nguyen Chi Anh

Task 2 : Shopping online is a nice way to buy some stuff but in my opinion I'd rather going to shop to shopping online. We love to shop anywhere, anytime, anyplace but sometimes, we get so consumed with purchasing things online, we forget how great it can be to physically go into a store. Online shopping can be amazing but I think it's better to get out into the world and see things in real life. When you go shopping in a store you can bring some friend with you which is good because it can bring people closer together. You can take advantage of in-store-only discounts with many student discounts only available in-store. By able to touch the item you can immediately discern the quality of an item. You can ask for someone else's opinion on how you look in something or is it suitable for you. One time, I bought a shirt online and it was a disaster. The shirt didn't look familiar with the one I saw online and it was unfit me at all. Since that time, I've never bought clothes online anymore. Finally, the best part of shopping offline is that you can get your item immediately ... no waiting required.
