

Task 1: Hi! I am so happy when you said that you are going to visit my town. The swimming pool is really great, it is big and clean. You can walk to the swimming pool from the town centre, just 5 minutes, along Nguyen Du street. The swimming pool is opposite the Asia restaurant and next to the town's library. I think you should go there at 5 pm because at that time, just a few people go swimming. If you have any question, you can contact me, I will help you or we can go somewhere together. Hope you have some fun when you visit my town. Can't wait to see you soon! Love, Hien

Task 2: Living in big families has both advantages and drawbacks. The advantage is that you will never feel alone because there are so many people in your family. You can have brothers, sisters and they can share with you, help you everything in your life. They help you do your homework, share housework with you, share with you their experience, raise you up when you feel bad,... In a big family, there are so many people so you have to share, therefore, you can learn how to give and take and you will soon know that give is more important than take and that is the true happiness. But there are some drawbacks. You also have some fun all the time, you can have some fun with children, chat with your mom and sisters, play game with your brother,... But there are still some drawbacks. First is the economic condition. Some big families even don't have enough money to take their children to school and give them some essential condition. In that families, you will have to go out and earn money even when you just a teenage, you can't go to school or learn what you want. I think every couple wife and husband should have just one or two children to bring them up in good condition.
