Task 2: Fashion style is the thing that people are very concern. But what style to wear depends on where we are or where we are going is a big factor. For me, I prefer wearing casual because it makes me feel comfortable and casual clothes are fabulous and very attractive. First, wearing casual makes us feel more comfortable with what we are wearing. Casual clothes are better to wear because it is not an extra expense since they are the same clothes we wear everyday of the week. It would create a more relaxing atmosphere to everywhere. By wearing casual clothes, people would be happier and more comfortable than wearing formal clothes everyday. Second, advantage of wearing casual clothes are fabulous and attractive. Of course, casual clothes must be always colorful than formal clothes. So it catches people's eyes when we wear. For example, when you go to the park, you can wear your favourite T-shirt with blue jeans and converse, it looks very energetic and dynamic or if you are gentle, you can wear a lovely dress that you like. It will make you more beautiful and attractive. In concluding, wearing casual clothes or formal clothes depend on your circumstances. You must be known when you have to wear casual or formal. But in anyway, just do what you like and wear what you love to make you happy.
