

Task 1: Hi, Spencer. I really feel happy for the meeting on Saturday. I suggest that we can eat in SVB's restaurant. I ate food in here and I were pleased with that. One more, staff's service attitude is nice. They are enthusiastic and have sexy body. The restaurant is big and have a basement for parking. We don't need to worry about it. I must take care my babies so I will come at 8.00 PM. See you!!! Task 2: When we do together, everything become easy more but someone tell that: "Traveling alone brings us a lot of benefit". I actually agree with that opinion. The first, you become to be independence person. If you travel alone, you will do it by yourself as: cook by yourself, ask for direction. You know you must learn how you can alive. I deal with dangerous situation and no one can help you in that. Your parent doesn't near you anymore and you must take responsibility for yourself. You find to how overcome difficult. It is hard but when you overcame, you will change. The second, you are free in everything. For example: you want to discover one culture, no one prevent you to it. It is comfortable when you indulge your hobbies. No one can complain about your lifestyle. You can do anything, come anywhere as long as what you want. The third, you can save your money. You just must worry about yourself, you rent one bike instead of paying money for taxi. You can walk as long as what you want. It is not only save money but also good for your health because I make you do exercise. Totally, traveling is when you can relax. You should choose what is reasonable. Traveling alone or together, it depend on yourself, what can bring for you many benefits more.
