Task 2: It was suggested that " An ideal house only needs to be large". It also may be an idea, a thought right for someone. In my opinion, an ideal home or not depends on the perspective of the user evaluate them. Someone they think a house is a house ideal large. It is not wrong but it is different from my opinion. In my opinion, an ideal house is not just airy space that it needs to tidy the suit decorated house. I would be very unhappy with a large house but messy and the indoor layout arrangement is not subtle. Moreover, a house located ideal terrain to suit you. That house near the school or your workplace? The house which is close to the market, shopping district?, .. I think that's a pretty important factor in choosing an ideal home for themselves. Not only that, the house will be more ideal if the location of the house where security and safety. It is also very important. In summary, I think a house is a house ideal factors include: spacious, comfortable, with appropriate geographic location and life work, how to decorate the house and the security and safety of the house. Everyone has own opinion about their ideal home, and me too. I think that would be very pleased and happy if we choose the suitable ideal home for themselves.
