

task1: I will be home at 7pm and I like meat, specially beef. You can cook beef-steak. In addition, I want to eat vegetables such as stir -fried morning glory, tomatoes or potatoes or some fruits: apple, jack fruit and so on. That's all task2: In my opinion, Keeping animals in zoos is not bad or not good because everything is always two side. Firstly, keeping animals in zoo can make them safe from hunters. However, natural habitat is also good for animals. I think animals can live anywhere providing that it is appropriate for them. Secondly, if we keep animals in zoo, we can visit the zoo to know more about them, to entertainment and so on. I think we should create a natural zoo for animals. It's not only a zoo but it's also a natural habitat for wildlife. Last but not least, animals are organisms which make a balanced environment. In conclusion, They play an important role in our lives so that we should protect animals, make them live in suitable place.
