

Task 1 Hi Ally, Wish you could have been there, but I was very happy that night because our friends came and celebrated my birthday. My uncle and cousins also came, too. We started with a small party of cake and coke, following with some board games. Before coming back home, our friends surprised me with a present, a kitten of the type that I like most. I felt so wonderful.

Task 2: To some people's opinion, an ideal house only needs to be large, but to me, it does not like that at all. An ideal house is where you can live comfortable, where you can enjoy your life. It does not depend on how big your house is. The problem of size can be solved in many different ways. Instead of using 300-litters refrigerator, you can buy a smaller one that fits perfectly to the corner of your house. You can also arrange things in a more suitable way, for example, place the oven above the refrigerator instead of placing next to it. So, it is clear that the problem above can be solved easily. The most important thing when I think of a house is the atmosphere people experience everyday in that house. A big house matters when you feel empty coming home after a hard day? No, a house should be where people want to come back at any time, especially they have difficulty. A house should give the family feelings and the cozy atmosphere. It does not matter whether it is big or small, it is where everyone in a family can share their happiness and sadness. In conclusion, I think an ideal house is where people can enjoy their life together with their family, no matter how big it is.
