

Dear Eric I think it is wrong to keep animals in zoos. Free the animals in captivity
It is wrong to keep animals in captivity because animals are just like human beings
, they have feelings and emotions .They have to live , eat , sleep, breed , die and
overall freedom .These are the 6 important factor of life . For example , African
elephants can weight as much as 14,000 pounds and are used to traveling between
watering holes and feeding sites hundreds of miles in order to be emotional and
freedom .Can you imagine having this elephant in a case? . Even if you give a lot of
food or water this animal is not going to be happy because the zoo is not his home,
the jungle is the place where he belongs . What we can do is like in Africa , have
an African safari Zoo with plenty of space, rivers and a lot of green forest so
everybody can visit them. Best wishes Hoai Thu
