

Task 1 dear Ngan I am very happy when you are going to visit my country next month. This time I am free so I can see you. When you come here I will take care of you. The weather there is so hot, so you should carry sunscreen clothing and sunscreen. On the way here, you should bring water because the weather is very hot. When you should wear glasses to avoid the sun. See you soon Task 2 It was suggested that "a successful film only needs famous actors". But I don't think so. Because a successful film depends on a lot of other factors example: script, director, location, ... However famous actors also contributed in no small part to the success of this. Because people object to the movies usually young, love to be watching the beautiful and famous actors. But the film's success is not only thanks to that cause if there is a well-known cast, then that script is not or it would not be welcomed by viewers, or filming locations or inappropriate, the weather did not support the movies that will fail. Things are demonstrated when awarded to an award-winning film required a lot of additional prizes around, not only the prize for famous actors. So a successful film coming from many sides that not just from the actor.
