The reason because I'm a big fan of traveling. In my opinion, traveling will bring us many benefits because of several reasons. First of all, traveling can make me relaxed and happy. Enjoying the stunning landscape and spectacular views is one of the ways to help get away from stress in my daily life. Second, traveling to far places is a good chance for me to broaden my horizons. When I travel, I can experience many things such as cultures or customs which make a considerable contribution to my knowlence. Finally, we are more likely to make friends with many people in other places, so we will not feel lonely and strange when traveling anywhere. Inconclusion, traveling plays an essential role in my life!
