

Task 1: Dear Lena, On my birthday, I was given a lot of presents from my family members and friends. Especially, there was a present which made me surprise the most. It was a card with a letter of my old friend. When I saw her card and letter, I felt like unbelievable, cause we hadn't met for long time. She was my high school's friend, we were very close. But she had to move to US because of his father's job. After that, we were still keep in touch but we didn't chat usually like before. And then, after 3 years I was touched by her card and letter. Her present gave me a sense of happiness and more faith about our friendship. Love, Linh

Task 2: Nowadays, plane is one of the most convenient transportation. There's an opinion that travelling by plane is very expensive and dangerous. In my point of view, I don't agree. Fristly, about the cost for a plane's ticket. Everybody just say it's expensive but they do not mention about the quaility special right they could get. The more modern plane you choose, the more money you have to pay. Seconly, about the safety condition. People think plane is dangerous because they afraid it will be falled. It such a ridiculous opinion. Actually, plane is a kind of modern technology, so it can't be falled easily. Moreover, we have to pay so much money for it so it's not a nonsense thing. it has to keep us safe. If there's a risk, it's because of not only the plane but also the pilot's fault. In short, travelling by plane is the most convenient way. And it's not as expensive and dangerous as we thought.
